

# Protective cover

## Product Description

This protective cover, robust and waterproof, enables you to protect your machine from a harsh environment when the work is finished and always keep the marking area clean for the next time.

## Benefits of the protective cover

### ■ Quick

Simply-shaped, it is very easy to slide over the machine after work within a few seconds.

### ■ Efficient

Thick & resistant, it prevents from dust, oil, water projections and so on. . . A simple way to keep the machine clean and make it last even more.

### ■ Longtime use

Made of PVC plastic, it is perfectly suited for an intensive use & does not require any precautions bending.

### ■ User-friendly

Transparent & recognizable with its big logo, it does not hide the machine and it can be easily located when it is taken off.
